

User Story

FAKE REVIEW SYSTEM

1) As an Administration [3]

I want that Users must have a valid user id and password to log in so that Their individual profiles can be created.

Acceptance Criteria -

- System must validate the user id and password.
- In case the user enters the wrong password then the user requires to enter the verification code sent on the mail id.

2) As an Administration [10]

I want that users should have the option to choose products for reviews so that their personalized experience can be collected.

Acceptance Criteria –

- User needs to be logged in before checking the truthness score.
- Reviews with their score of the product are displayed.

3) As an Administration [2]

I want that I can directly register a new customer, so I can directly create a new user

Acceptance Criteria -

- Administrator can access the database with its id and password.
- System can check if the access request is coming from the administrator

4) As a User [10]

I want the genuine reviews so I can purchase the correct product

Acceptance Criteria –

- User must be logged in.
- User must have a place to enter product details.

5) As an Administration [6]

I want that Users should be restricted to delete or modify any other uses review so that Honest reviews can be collected

Acceptance Criteria –

- Administrator can access the database with its id and password.
- System can check if the access request is coming from the administrator.

6) As a User [4]

I want a well-authenticated system.

Acceptance Criteria –

- System asks the user if the user wants to quit the session.
- User is logged off from the account
